Established in 1991, FallTech® began manufacturing only essential personal fall arrest components for select channel partners. During the next decade while demand grew and regulations were added, FallTech® increasingly expanded into many additional fall arrest solutions. Throughout this time, controlling and maintaining our in-house design, testing, manufacturing and sourcing processes became the foundational structure we continue to uphold today from our operations in Compton CA.

Fall Protection safety is more than a job for us – it’s our purpose and our enterprise. Our ISO 17025 accredited test lab ensures FallTech® products meet or exceed ANSI and CSA standards and OSHA regulations and always deliver uncompromised performance and resolute quality for our users even in their most demanding conditions.

28 years on from the basic provision of body belts and lanyards, the standards have changed and some regulations shifted but our commitment to your safety has not hesitated.
