

FOR IMMEDIATE RELEASE

Journeyman II TowerClimber[®] Harness Joins FallTech's TowerClimber[®] Series

~ With critical features to support Tower work~

COMPTON, CA (October 30, 2015) – FallTech, a leading manufacturer of fall protection products built for all industries where workers are exposed to falls from elevation, today announced the release of the Journeyman II TowerClimber[®] Harness.

Featuring 6 D-rings, dorsal, sternal, side and seat; Tongue buckle legs and quick connect chest, with a durable 6" waist pad and padded work seat sling, the Journeyman II TowerClimber[®] Harness is a perfect complement to the already successful ComforTech, Journeyman and FlowTech Harnesses in the TowerClimber[®] Series.

- Lightweight, breathable yoke with integrated molded anti-slip dorsal D-keeper
- New easily adjustable high-tension friction adjusters
- Expansive, breathable leg pads fixed in place
- Abrasion resistant webbing
- Aluminum-reinforced, removable positioning/suspension seat

The workhorse of the FallTech line, Journeyman II TowerClimber[®] Harnesses stand up to the rigors of all day use.

About FallTech

FallTech is a leading manufacturer of fall protection products built for all industries where workers are exposed to falls from elevation. Headquartered in Compton, CA and marketed globally, FallTech is staffed with engineers, product developers and experts dedicated solely to the design, testing and manufacturing of fall protection products. For over twenty years, FallTech has been outfitting people when they are exposed to fall hazards at work and tackling fall protection problems the way they happen in real life...one worker at a time.
