### 20' Assisted Rescue Ladder

The FallTech® Assisted Rescue Ladder is a synthetic web rescue ladder designed to assist in the rescue of a conscious and able fall victim. Deploys quickly and easily with minimal training required. Alloy steel reinforced Hi-Vis webbing rungs and reflective tape make the ladder easy to find in all environments and conditions. ANSI Z359.12 compliant attachment carabiner included.

- Alloy steel tube reinforced rungs for durable and consistent performance
- Hi-Vis synthetic webbing and reflective tape makes ladder easy to identify, even in dark confined space environments
- Included ANSI Z359.12 attachment carabiner allows for quick and easy install to any appropriate anchorage
- 20' length provides reach to victim including situations such as leading edge foot level anchorage falls
- Hi-Vis Rip-Stop and anti-slip fabric carrying bag facilitates quick deployment and long term protection against the elements
- Easy to use with minimal rescue training required
- For use in rescue applications of conscious and able victims

Reflective Tape

#### Material Specifications

Ladder	Polyester Web
Rungs	Polyester Web with Alloy Steel Tube Reinforcement
Bag	Rip-Stop Fabric

#### Assisted Rescue Ladder

Part No.	Length
685020	20'

#### Performance Specifications

Static Strength	3,600 lbs. Minimum
ANSI User Capacity	One User up to 310 lbs. Max
OSHA User Capacity	Allowable up to 425 lbs. Max.
